BEE DWELLING ASSEMBLY

The waffle structure is made of pine plywood using CNC machining, and assembles simply by waffle finger joints. The interior bee house is a solid pine container to hold CNC machined mason bee trays

INTEGRATE

SEASONAL PLANTINGS

Garden boxes containing a variety of plant species that grow throughout the seasons provide islands of attractive pollinating area, and allow for further research and development in pollination and bee house proximities, seasonal and varietal plants that encourage bee population growth and sustainability, and cross-pollination of plant varietals.
